Notice of Correction

In the above-mentioned article, the references cited in the legend to the Central Figure were incorrect. The corrected legend is printed below.

Published survival with EPP matched MARS; random assignment to no EPP resulted in better outcomes. The *diamonds* represent Rice DC, et al (Outcomes after extrapleural pneumonectomy and intensity-modulated radiation therapy for malignant pleural mesothelioma. *Ann Thorac Surg*. 2007;84:1685-92), and references 17, 10, and 12.
